Part E - Retention Rates

School: All Schools

Retention rates will be automatically calculated based on information provided by the institution. Data to be entered by the institution:

1. Full- and part-time bachelor's cohorts from Fall 2013 (include only FIRST-TIME students);
2. Exclusions from each of these cohorts (see below for allowed exclusions); and
3. Number of students from these cohorts who are still enrolled in Fall 2014 (include students that re-enrolled and students with continuous enrollment).

Use your institution's official fall reporting date or October 15 when counting students. The student status (full- or part-time) should be based on the Fall 2013 status, even if this has changed from Fall 2014 (e.g., if a student has gone from part-time to full-time, report them as part of the part-time cohort). For institutions that use a full-year cohort: Use the 3-month period of August 1 through October 31 to define the retention cohort.

Report full-time and part-time separately in their appropriate boxes.

In the Exclusions boxes (for both full- and part-time), report the number of students who left the institution for any of the following reasons:

1. Died or were totally and permanently disabled;
2. Serve in the armed forces (including those called to active duty);
3. Serve with a foreign aid service of the Federal Government (e.g., Peace Corps); or
4. Serve on official church missions.

Part F - Student-to-Faculty Ratio

School: All Schools

The IPEDS methodology provides an estimate of full-time equivalent student (FTES) based on overall institutional enrollment. When determining the student-faculty ratio (SFR) by school, this method is flawed in that students from one school generally take courses outside of their enrollment school. A high SFR for one school may indicate higher overall course enrollment and/or a greater ratio of student course enrollment IN OTHER SCHOOLS, or vice versa.

A more accurate method for schools is to base FTES on total course credits taught within the school. The Average Credit Load (ACL) for a full-time student (line IS-2) is calculated based on total credit hours FOR THE INSTITUTION divided by number of full-time equivalent students (line 4) FOR THE INSTITUTION. Total credit hours within all schools or the selected school, as applicable, are divided by ACL to calculate the FTES. When 'All Schools' is selected, SFR based on Student Enrollment (line 18) and Student Credit Hours (IS-4) will be identical.
